

Appendix 15: priority outcome rankings

Outcomes ranked in any EDPPs 'top-5' priority list are given in Table 1 ordered by overall priority (total number of points allocated).

Table 1: Priority outcomes

Overall rank	Outcome	Total points
1	Prescribing errors	10
2	Reduced length of stay	7
3	Efficiency of care	5
4	Prevention of re-attendance	5
5	Treatment which adheres to trust policy and guidelines	5
6	Accurate medication history/medicines reconciliation	5
7	Reduce mortality	4
8	Adverse drug events	4
9	Amount of patient contact	3
10	Time to drug administered	3
11	Resolve medication queries	3
12	Amount of waste	2
13	Timely supply of medication	2
14	Number of invasive procedures	1
15	Patient satisfaction with consultation	1

Outcomes prioritised by individual EDPPs, for practitioner and traditional outcomes, are listed below.

Practitioner outcomes

EDPP 1

1. Reduced number of prescribing errors (5)
2. Reduced length of stay (4)
3. Prevention of re-attendance (3)
4. Reduced waste (2)
5. Reduction in invasive procedures (1)

EDPP 2

1. Increased efficiency of care (5)
2. Reduce mortality (4)
3. More patient contact (3)
4. Prevention of re-attendance (2)
5. Treatment which adheres to Trust policy and guidelines (1)

EDPP 3

1. Reduction in prescribing errors (5)
2. Treatment which adheres to trust policy and guidelines (4)
3. Reduction in time to drug administered (3)
4. Reduce length of stay (2)
5. Patient satisfaction (1)

Traditional outcomes

EDPP 1

1. Accurate medicines reconciliation/drug history (5)
2. Reduce ADRs (4)
3. Reduce medication queries (3)
4. Timely supply of medicines (2)
5. Reduce length of time in department (1)
